

Long Beach, Calif., Feb. 15, 2014-- BioShaft Water Technology Inc. has appointed Bashar Amin as its new President.

Bashar Amin has more than 25 years of experience in wastewater treatment, upper management, marketing, finance, and business development. Amin replaces Walter Zurawick, who has been an effective member of the BioShaft team for the last two years and has provided BioShaft with the first four important references/ projects in the USA. Walter Zurawick decided to take back his VP sales position and focus on sales only.

BioShaft appreciates the effort and vision Walter Zurawick has put forth over the last two years and his leadership and guidance played a key role in the success of the company in the US.

Amin is the founder and owner of the Ontario Based "Canadian Environmental Designer Inc.". His expertise includes 25 years of work in wastewater treatment, zero liquid discharge, recycle/reuse applications, energy integration/high strength wastewater treatment, engineering economics and financial evaluation. He has extensive technical expertise and strong global business development management capability. He spent the last 25 years in sales, upper management, marketing and business development.

"These are exciting times at BioShaft, we have completed few world class industrial and domestic wastewater references. Established key sales reps professionals and distributor domestically and international to go along with state-of-the-art, sustainable technology that will lead BioShaft into the future as we have found our technology is the perfect fit for customers all over the world," said Amin, who has a leading role in developing the technology from the lab to the real world.

Amin's expertise includes entrepreneurial and strategic planning in all facets of project life cycle, from initial viability analysis and conceptual design to documentation and implementation. Since obtaining a Master's of Science in Environmental Engineering at the California State University in Fresno and Water Resources Control Board Engineer Classification for the State of California and satisfied the academic qualifications for the Professional Engineers of Ontario, Canada. Amin has developed broad-based skills and has a proven track record in the areas of general management, P & L management, operations, sales, product development, and human resources management.
